EXPLORATION GRANTS
FOR RESEARCH ON GAMBLING DISORDERS
Up to $10,000 per year for one year
Deadline: Ongoing in 2012

The National Center for Responsible Gaming (NCRG) is a nonprofit 501(c)(3) organization that has served as the only national, private funder of scientific research on gambling disorders in the United States since 1996. (For a list of grants supported by the NCRG since 1996, go to www.ncrg.org)

The NCRG awards grants on a competitive basis under the leadership of the Scientific Advisory Board. Composed of leading independent scientists with expertise in addiction and related topics, the Scientific Advisory Board plays a vital role by ensuring the NCRG follows rigorous standards in awarding grants for only the highest quality research proposals. The following is the current roster of members:

Chair
Linda B. Cottler, Ph.D., M.P.H.
Dean's Professor of Epidemiology
University of Florida

Board Members
Jeff Derevensky, Ph.D.
Professor of Applied/Child Psychology
Co-Director, International Centre for Youth Gambling Problems and High-Risk Behaviors
McGill University

Mark S. Gold, M.D.
Donald Dizney Eminent Scholar,
Distinguished Professor and Chair of Psychiatry
University of Florida College of Medicine

Eileen Luna-Firebaugh, J.D., M.P.A.
Associate Professor of American Indian Studies
University of Arizona

Lisa M. Najavits, Ph.D.
Professor of Psychiatry
Boston University School of Medicine

David Takeuchi, Ph.D.
Associate Dean for Research and Professor of Sociology
University of Washington

Charles Wellford, Ph.D.
Professor of Criminology & Criminal Justice
University of Maryland
Ken C. Winters, Ph.D.
Professor of Psychiatry
Director, Center for Adolescent Substance Abuse Research
University of Minnesota

Harold Wynne, Ph.D.
President
Wynne Resources, Ltd.

**Purpose of the Exploration Grants Program**

Exploration Grants provide quick access to funding for researchers focused on gambling disorders. Funds can be used to support a broad range of activities including:

- Pilot data to complete an initial but unfunded project.
- Pilot data needed for preliminary results.
- New direction on a current project not otherwise supported.
- Funded projects that did not build costs into budgets for services previously free or subsidized which now carry a cost.

**Available Funding**

Applicants may request up to $10,000 in direct costs for a period not to exceed 12 months. The NCRG expects to award three Exploration Grants in 2012. The Principal Investigator may apply for only one Exploration Grant per cycle.

**Funding Priorities**

The proposed research investigation may focus on a broad range of research that develops and tests psychosocial or pharmacological approaches for prevention, intervention, treatment or relapse prevention of gambling disorders.

The NCRG is especially interested in brief interventions targeted at underrepresented populations, such as minorities, young adults and persons with subclinical gambling disorders.

Other priorities include the following topics:

- Impact of Indian gaming
- Gambling and minorities
- Secondary data analysis
- Technology and gambling

**Eligibility**

Both public and private nonprofit organizations are eligible to receive grants from the NCRG. Profit-making organizations should contact Christine Reilly (creilly@ncrg.org). Foreign institutions are required to collaborate with a U.S. institution. Applications involving a non-U.S. institution must have a principal investigator and fiscal agent based at a U.S. institution.
The NCRG seeks proposals of high scientific merit from investigators who show promise of disseminating their work at high-impact conferences and in peer-reviewed scientific journals.

The Scientific Advisory Board, following review procedures of the National Institutes of Health (NIH), will evaluate applications for scientific and technical merit according to the following criteria, adopted from the NIH:

1. **Significance.** Does the project address an important problem or a critical barrier to progress in the field? If the aims of the project are achieved, how will scientific knowledge, technical capability and/or clinical practice be improved? How will successful completion of the aims change the concepts, methods, technologies, treatments, services or preventative interventions that drive this field?

2. **Investigator(s).** Are the Principal Investigator (PI), collaborators and other researchers well suited to the project? If the project is collaborative, do the investigators have complementary and integrated expertise; are their leadership approach, governance and organizational structure appropriate for the project?

3. **Innovation.** Does the application challenge and seek to shift current research or clinical practice paradigms by utilizing novel theoretical concepts, approaches or methodologies, instrumentation or interventions? Are the concepts, approaches or methodologies, instrumentation or interventions novel to one field of research or novel in a broad sense? Is a refinement, improvement or new application of theoretical concepts, approaches or methodologies instrumentation, or interventions proposed?

4. **Approach.** Are the overall strategy, methodology and analyses well-reasoned and appropriate to accomplish the specific aims of the project? Are potential problems, alternative strategies and benchmarks for success presented? If the project involves clinical research, are the plans for protection of human subjects from research risks justified in terms of the scientific goals and research strategy proposed?

5. **Environment.** Will the scientific environment in which the work will be done contribute to the probability of success? Are the institutional support, equipment and other physical resources available to the investigators adequate for the project proposed? Will the project benefit from unique features of the scientific environment, subject populations or collaborative arrangements?

**Additional Review Criteria**

In addition to the above criteria, the following items will be considered in the determination of scientific merit and the priority score:
• **Protection of Human Subjects from Research Risk**: The involvement of human subjects and protections from research risk relating to their participation in the proposed research will be assessed.

• **Inclusion of Women, Minorities and Children in Research**: The adequacy of plans to include subjects from both genders, all racial and ethnic groups (and subgroups), and children as appropriate for the scientific goals of the research will be assessed. Plans for the recruitment and retention of subjects will also be evaluated.

• **Care and Use of Vertebrate Animals in Research**: If vertebrate animals are to be used in the project, the five items described in PHS Form 398 research grant application instructions will be assessed.

• **Biohazards**: If materials or procedures are proposed that are potentially hazardous to research personnel and/or the environment, determine if the proposed protection is adequate.

**Additional Review Considerations**

• **Budget**: The reasonableness of the proposed budget and the requested period of support in relation to the proposed research plan.

• **Topic**: The relevance of the proposed research plan to the stated funding priorities.

**Application Instructions**

Applications will be accepted on an ongoing basis and, therefore, applicants may submit anytime in 2012. Applicants must use the application form provided. Enter text in the shaded areas on the form. The document will automatically convert the text into Arial 11 point font. To download the Exploration Grant application form, go to www.ncrg.org/research-center.

**FACE PAGE (1 page)**

The **Principal Investigator** (PI) is the person responsible for the scientific and technical direction of the project and is the primary contact for the NCRG. Provide full name, degree(s), title, department, institution, mailing address, telephone number and e-mail address.

**Date of Proposed Period of Support.**

Projects may begin one month from the application submission date in 2012 and conclude no later than within one year.

**Funds Requested**. Requests may not exceed $10,000 in direct costs. An indirect rate higher than 8 percent is not allowable.

**Applicant Organization**. The Applicant Organization is legally and financially responsible for the conduct of activities supported by the award. Provide the name and contact information of the Applicant Organization’s Administrative Contact.

**Regulatory Approvals**. Please check the appropriate box to indicate the use of animals
(IACUC) or human subjects (IRB) in the proposed project. Note that the PI must provide a copy of the IACUC and/or IRB letter to the NCRG before award funds will be released. Pending approvals at the time of application submission are acceptable.

**Certifications.** The signatures of the Principal Investigator and the Official Signing for the Organization are required only on the original hard copy of the application.

**PROJECT SUMMARY/ABSTRACT; SENIOR/KEY PERSONNEL; PREVIOUS SUPPORT (1 page)**

Insert text in the shaded areas on the form provided.

**Project Summary/Abstract.** Provide a succinct and accurate description of the proposed work suitable for dissemination to the public. State the application's broad, long-term objectives and specific aims. Describe concisely the research design and methods for achieving the stated goals.

**Senior/Key Personnel.** In addition to the Principal Investigator, Senior/Key Personnel are defined as individuals who contribute to the scientific development or execution of the project in a substantive, measurable way, whether or not salaries are requested. List the Principal Investigator, last name first. Then list all other Senior/Key Personnel in alphabetical order, last name first. For each individual, provide name, institutional affiliation and role on the project.

**Previous Support from the NCRG.** Please list the title of any grant awards to the Principal Investigator from the National Center for Responsible Gaming, the Institute for Research on Pathological Gambling and Related Disorders and/or the Institute for Research on Gambling Disorders. Identify products resulting from the grant(s), such as publication in a peer-reviewed journal, a poster or presentation at a conference, or subsequent support from NIH or another funding entity to continue the development of the research project.

**BIOGRAPHICAL SKETCH (maximum of four pages)**

The Biographical Sketch of the principal investigator should not exceed four pages.

**RESEARCH PLAN (2 pages)** Enter text into the shaded areas. The document will restrict the word count of text entered on these pages to approximately 1,470 words.

**A. Specific Aims.** State concisely the hypothesis to be tested and the specific aim(s) to be achieved during the grant period. The review panel will consider whether the aims are reasonable to achieve during the one-year period and if successful completion of the aims will improve scientific knowledge, technical capability and/or clinical practice.

**B. Background and Significance.** State the significance of the proposed project to the field. The review panel will ask: Does the project address an important problem or critical barrier to progress in the field? Does the application challenge and seek to
shift current research or clinical practice paradigms by utilizing theoretical concepts, approaches or methodologies, instrumentation or interventions that are novel to one field of research or novel in the broad sense?

C. **Research Design and Methods.** Concisely present your experimental design and the methods to be used to accomplish your specific aims. Also, indicate how the results will be interpreted and how they will lead to future investigations. The review panel will ask: Are the overall strategy, methodology and analyses well-reasoned and appropriate to accomplish the specific aims of the project?

**HUMAN SUBJECTS AND VERTEBRATE ANIMALS** (2 pages) Enter text into the shaded areas on of the application form. The document will restrict the word count of text entered on these pages to approximately 1,470 words.

*Protection of Human Subjects*

If applicable, summarize your plan to protect human subjects according to the following outline:

1) Risks to Human Subjects
   a) Human Subjects’ Involvement and Characteristics
      - Describe the proposed involvement of human subjects in the work outlined in the Research Plan section.
      - Describe the characteristics of the subject population, including their anticipated number, age range and health status.
      - Identify the criteria for inclusion or exclusion of any subpopulation.
      - Explain the rationale for the involvement of special classes of subjects, such as fetuses, neonates, pregnant women, children, prisoners, institutionalized individuals or others who may be considered vulnerable populations. Note that “prisoners” includes all subjects involuntarily incarcerated (for example, in detention centers) as well as subjects who become incarcerated after the study begins.
      - List any collaborating sites where human subjects research will be performed, and describe the role of those sites and collaborating investigators in performing the proposed research.

b) Sources of Materials
   - Describe the research material obtained from living individuals in the form of specimens, records or data.
   - Describe any data that will be collected from human subjects for the project described in the application.
   - Indicate who will have access to individually identifiable private information about human subjects.
• Provide information about how the specimens, records or data are collected and whether material or data will be collected specifically for the proposed research project.

c) Potential Risks

• Describe the potential risks to subjects (physical, psychological, financial, legal or other), and assess their likelihood and seriousness to the subjects.

• Where appropriate, describe alternative treatments and procedures, including the risks and potential benefits of the alternative treatments and procedures, to participants in the proposed research.

2) Adequacy of Protection Against Risks

a) Recruitment and Informed Consent

• Describe plans for the recruitment of subjects (where appropriate) and the process for obtaining informed consent. If the proposed studies will include children, describe the process for meeting requirements for parental permission and child assent.

• Include a description of the circumstances under which consent will be sought and obtained, who will seek it, the nature of the information to be provided to prospective subjects, and the method of documenting consent. If a waiver of some or all of the elements of informed consent will be sought, provide justification for the waiver.

b) Protections Against Risk

• Describe planned procedures for protecting against or minimizing potential risks, including risks to privacy of individuals or confidentiality of data, and assess their likely effectiveness.

• Research involving vulnerable populations, as described in the DHHS regulations, Subparts B-D, must include additional protections. Refer to DHHS regulations, and OHRP guidance (www.hhs.gov/ohrp).

Where appropriate, discuss plans for ensuring necessary medical or professional intervention in the event of adverse effects to the subjects. Studies that involve clinical trials (biomedical and behavioral intervention studies) must include a general description of the plan for data and safety monitoring of the research and adverse event reporting to the IRB and others, as appropriate, to ensure the safety of subjects.

3) Potential Benefits of the Proposed Research to Human Subjects and Others

• Discuss the potential benefits of the research to human subjects and others.

• Discuss why the risks to subjects are reasonable in relation to the anticipated benefits to research participants and others.
4) Importance of the Knowledge to be Gained
   • Discuss the importance of the knowledge gained or to be gained as a result of the proposed research.
   • Discuss why the risks to subjects are reasonable in relation to the importance of the knowledge that reasonably may be expected to result.

5) Data and Safety Monitoring Plan
   • If the research includes a clinical trial, create a heading entitled “Data and Safety Monitoring Plan.”
   • Provide a general description of a monitoring plan that you plan to establish as the overall framework for data and safety monitoring.
   • Describe the entity that will be responsible for monitoring and the process by which Adverse Events will be reported.

Vertebrate Animals

If vertebrate animals are involved in the project, address each of the five points below.

1) Provide a detailed description of the proposed use of the animals for the work outlined in the Research Plan Narrative. Identify the species, strains, ages, sex and numbers of animals to be used in the proposed work.

2) Justify the use of animals, the choice of species and the numbers to be used. If animals are in short supply, costly, or to be used in large numbers, provide an additional rationale for their selection and numbers.

3) Provide information on the veterinary care of the animals involved.

4) Describe the procedures for ensuring that discomfort, distress, pain and injury will be limited to that which is unavoidable in the conduct of scientifically sound research. Describe the use of analgesic, anesthetic, and tranquilizing drugs, and/or comfortable restraining devices, where appropriate, to minimize discomfort, distress, pain and injury.

5) Describe any method of euthanasia to be used and the reason(s) for its selection. State whether this method is consistent with the recommendations of the American Veterinary Medical Association (AVMA) Guidelines on Euthanasia. If not, include a scientific justification for not following the recommendations.

BUDGET (1 page)

Use the form provided to present a summary of the proposed budget.

Allowable Cost Items:

• Personnel. Allowable personnel expenses include salary and applicable fringe benefits for the PI, post-docs and graduate students (if they receive a salary) and other professional and technical staff.

• Consultant Costs. Identify consultants by name and estimate the number of
days of service and rate of compensation.

- **Human subjects.** Costs of recruitment (e.g., purchase of advertising), payments to subjects, patient care and other costs associated with the use of participants in the study.

- **Indirect costs.** Eight percent of the total direct costs.

- **Travel.** NCRG grantees are required to present a poster at the annual NCRG Conference on Gambling and Addiction. Budget for travel to the conference in Las Vegas, Nev.

### Unallowable Cost Items

Funding will not be provided for the following:

- **Administrative personnel**
- **Stipends**
- **Office equipment and furniture**
- **Tuition**
- **Dues and membership fees**
- **Maintenance/service contracts**
- **Construction, alteration, maintenance or rental of buildings or building space**
- **Recruiting/relocation expenses**
- **Entertainment/social expenses**
- **Pre-award costs**

### Budget Justification

In the space below the Budget Summary, explain and justify costs presented, providing calculations to demonstrate how amounts were determined. Enter text in the shaded area.

### APPENDIX

The Appendix should include items such as a list of references cited and letters of support.

### SUBMISSION PROCESS

1. Applications for Exploration Grants are accepted anytime.

2. Create a single PDF document named as follows: PI’s Last Name_Exploration_2012. Upload the document to the NCRG Review Express website (https://editorialexpress.com/ncrg).

3. The original hard copy, with original signatures, should be mailed to Christine Reilly, NCRG, 900 Cummings Center, Suite 418-U, Beverly, MA 01915 (telephone: 978-338-6610).

Questions? Contact Christine Reilly senior research director, (creilly@ncrg.org; 978-338-6610) or Nathan Smith (nsmith@ncrg.org; 978-338-6610).
